SUPPLEMENT

Sunday Morning, November 14, 1869. M THE SOUTH CAROLINA COLORED CON

SERVATIVE CLUB. - A meeting of this organization was held last evening at Oppenheim's Hall, corner of King and Hudson streets. It was largely attended by the better class of colored citizens, and several addresses were made urging co-operation in the movement, and showing the evil results of radical government. The following preamble and resolutions were manimously adopted:

Whereas, The undersigned colored men of Charleston being now convinced of the corruption, extravagance and inefficiency of the present rulers of this State and city, and having discovered that under the disguise of doing good to the colored people, strangers have come here only to advance their own personal interests, but having really no affection for nor mo-interest with us, and that many native Carolinians have joined them only for the purpose of obtaining a share of the spoils; and being convinced that the great and unprecedented taxation, and other bad government under which we are now suffering, are the results of these men obtaining offices; and being convinced that our true and supplied by an engine into the latter pit, only friends are to be found among the while the outlet was at Newbury. intelligent native gentlemen of this State, whom we have known all our lives and have never found them wanting when needed nor in time of trouble; and being convinced that our interests are identical with theirs, and that their prosperity is also ones; and being convinced that to them alone we have to look for a re-organization of our State and city governments, upon the bases of honesty and efficiency; and being fully satisfied that we will receive every justice at their hands, therefore, be it.

Resolved. That we organize ourselves into a society, not to any party whatever owing any allegiance, but for the only object of freeing our State and city from honest and capable men in their places.

any office whatever, but to use all our influence to defeat all such candidates, and elevating to office only our own native come spectators of the mournful work and honest citizens and such others as going on at McIntosh. It was a quarter our own gentlemen may, in their wisdom,

was then effected by the election of the following officers: A. L. Harper, President; A. Dean, first Vice-President; moved te their homes, where two of John Thomas, second Vice-President; them died, and we regret to hear that John Thomas, second Vice-President; L. J. Taylor, Secretary; Benjamin Brown, Treasurer; W. G. Ront, Chairman of the Executive Committee.

IMPORTANT UNDERTAKING .- The New York Tribune, referring to the obstructions at Hell Gate, has the following item about a canal which it is proposed shall be built to avoid the danger at that point: W. W. Vanderbilt, late Constructing Engineer of the Pacific Mail Steamship Company, has conceived a plan of excavating a canal through the promontory upon which Astoria stands, and thereby forming a straight course from the East River to the entrance to the Sound, thus avoiding the crooked and dangerous channel now used by craft in entering the Sound from New York and vice versa. At first glance this is a startling proposition, yet upon examination the plan appears not only feasible, but far more economical than any yet put forward. The work could be accomplished ward. The work could be accomplished with certainty, regardless of tide and weather; and could be completed inside of two years, at an estimated cost of not exceeding \$3,000,000. The channel proposed would be about two thousand feet in length, six hundred feet in breadth, equal to the width between Blackwell's Island and the Long Island shore, and with a depth at low tide of thirty-four feet, so that vessels of any draft and tomnage could pass through at all times of tide, and by night as well as day in perfect safety. The point cut off from the with certainty, regardless of tide and weather, and could be completed inside nage could pass through at all times of tide, and by night as well as day in perfect safety. The point cut off from the main land could be appropriately used for the storage of petroleum and like inflammable stuff, or for a variety of other purposes.

DANGER OF KEROSENE,-Last Wednes-DANGER OF KEROSENE.—Last Wednesday evening, at Hurwich, Mass., two little girls, of six and four years, respectively, were left with a kerosene lamp burning in the chamber in which they had been put to bed. The house took fire and the children perished. They cannot tell their story, but all the appearances indicate that the fire originated in their room, the lamp flows heir sed in their room, the lamp flows heir ed in their room, the lamp-flame being the only fire therein. There was proba bly an explesion, with the usual consequences. This might have been occasioned in various ways known to those who are familiar with the dangers of this method of artificial illumination. To add to the distress of this wretched "accident," the mother of the children, inconsolable for their loss, has become a maniac.

LAWKER CRAFT .- The Government has bad luck with its indictments. On Monday a culprit who had stolen \$12,000 from the Treasury was discharged on ac-count of a flaw in the indictment, making the fourth discharge of this sort ing the fourth discharge of this sort within a brief period, towit: one for \$30,000, one for \$200,000, one for \$30,000 and the fourth for \$12,000. Can't the District of Columbia obtain an attorney capable of drawing an indictment? So long as justice shall depend as it has hitherto done upon technicalities and professional craft, both the Government and the people will stand a poor chance for enjoying its blessings. for enjoying its blessings.

AWYUL ACCIDENT IN A MINE. -ANOTHER Country Expression in England.—The London Daily News says: "On Friday, October 22, information

reached Frome that an explosion of firedamp had taken place in one of the New-bury pits. The pit is called the MacIn-tosh, and had only recently been put in working order, though it had been opened five years ago. It is one of two worked at Newbury by the Westbury Iron Company, (limited,) the down-shaft being at Newbury pit, and the up-shaft at the McIntosh. The depth of the latter pit is one bundred and twenty fathoms, and the average seam of coal five feet six inches.

"The system of working pursued is the eight hours' shift, and at six o'clock the night men had come up and the day men were going down. At halfpast six thirteen men and boys had been let down, and the remainder were ready to follow. The lamps were duly delivered by the lampman, all being locked. In a few seconds after the last batch had gone down a loud rumbling noise, followed by a shock as of an earthquake, was heard, and those above ground were at once aware that an explosion had taken place. Very naturally there was great excitement, but prompt steps were taken to ascertain the extent of the disaster, and, if possible, rescue the unfortunate men. The bailiff, Mr. Baker, descended the Newbury pit, and on entering the main level he found that the door which separated the pit had been destroyed, but he was enabled to secure the fragments, and by these means to restore the ventilation to the McIntosh pit, the draught, it should be understood, being

"As soon as practicable, there were plenty of willing volunteers to descend the pit in search of their unfortunate comrades. It was some time ere any tidings reached the bank, and as the shock had been relt for fully half a mile around, a great crowd had assembled, and a most agonizing scene ensued. The pit gave employment to fifty-five persons, and wives and children and mothers and fathers tearfully awaited the result. When at last the first body came up, the anguish of the scene was, if possible, increased. A human form remained, and that was about all. The features were scorched so as to be almost unrecognizable, and the clothes were burnt or torn its present corrupt rulers and placing apart. Thus hour after hour the sad work went on, despair and hope alter-Resolved, That we do pledge ourselves nating as the cage brought up its living, never to vote for any incompetent candidate, be he Republican or Democrat, for any office whatever, but to use all our inhad by some means become aware of the calamity, and at once struck work to bepast one o'clock when the last of the unsee fit to recommend and support.

The thorough organization of the club while almost the entire medical staff of only one is likely to survive. The scene in the pit must have been appalling. The dead and wounded, had been blown up and down the pit, and two had gone into a pool of water, whence they were fished up by a crook."

Cotton Seed for Sale.

Cotton Seed for Sale.

I HAVE for sale some Cotton SEED, grown and improved in South Carolina, and the same as that improved by Mr. Dickson, and equal to it in every respect; and from one acre of which I have already gathered 3,000 pounds. I will be pleased to show my field, with the stalks thereon, to parties visiting the city during the Fair—it is but ten minutes walk from the Fair Grounds. In order to put it within the reach of all, I will deliver any quantity, one bushel or upwards, at any depot in Columbia, for \$2.50 per bushel—just half the price asked for Dickson's. My Cotton was free from rust, and the Seed carefully saved; and I will guarantee that it will make two bales per acre on good land and with proper cultivation, manure, &c.

I have also some Seed of a new variety—'the Pecler'—which is a much finer Cotton, and equally as prolific as the other. I will sell some of it also at \$5.00 per bushel.

The Electrifying Funambulists.

The above Artists are aided by a large force of Auxiliary Talent, super-added to Hutchinson's Acting Dogs, Murray's Trained Horses, Den Stone's Comic Mules, and the Complex KLU-KLUX PANTAMORPHS.

STONE & MURRAY advertise only such attractions as are actually in their possession, and they wish it understood that they win success by deserving it.

The New Water-proof Pavilion contains seats for 3,700 people. No Standing Room. Seats for all patrons. One-half of the Pavilion Seats will be reserved for Ladies and children and Gentlemen accompanying them. An efficient Police will be constantly present to preserve order in and near the Pavilion.

ST Particular attention is called to the fact that Stone & Murray's Circus travels exclusively by railroad, on special trains, consequently there will be no parade of empty wagons and jaded animals. The attractions of this Circus are inside the Pavilion, and not on the streets; therefore, (with the exception of the BAND CHARIOT, drawn by Sixteen Thorough-bred Horses,) no attempt will be made to induce patronage by the obsolete use of a so-called "Gorgeous Free Pageant."

To TONE & MURRAY'S CIRCUS will exhibit in CHESTER, Nevember 16; WINNED-RO, November, 17; NE WAE BHY, November 19; ABEVILLE, November 20.

FEMALE REGULATOR!

THIS valuable medicine is prepared for wonare secusively, and to be used by women only. It is adapted especially to those cases where the womb is disordered, and will cure any irregularity in the "menses," except in such cases as require a surgical operation. As these last are very rare, the FEMALE REGULATOR is of almost universal application. In a sudden check of the "monthly courses" from cold, trouble of mind, or like cause, it acts like a charm, by restoring the fever, headache, pain in the small of the back and "lower stomach," flushes of heat about the face, chilly sensations, burning of the eye-lids, and general restlessness. Taken in time, all these symptome pass away immediately, without injury to the constitution. Frequently, however, the proper reredy is not applied in time, the disease becomes chronic, and the foundation laid for numberless evils to the constitution of the woman. The next "turn" comes around, and there is no "show," or perhaps the "whites" will appear. There will be some uneasiness about the womb, but very little or none of the natural fluid escaping. The complexion becomes sallow, bowels swollen, a sort of greenish caste about the face, constant, dull, aching pains in the head, weight in the lower stomach and back, with or without whites, palpitations of the heart, pallor, exhaustion, indigestion, weariness, languor, aching across the loins, loss of appetite, pain in left breast, tightness across the chest, cough and giddiness. If still allowed to go on, "green sickness" will be fully developed; the headsche becomes severe, with loss of memory, diminished sensibility, sick stomach, dyspepsia, no relish for food, loss of flesh, increased fluttering of the heart, swelling of the sease durried breathing, almost to suffocation. The skin is flabby, and has a "doughy feel." This is a sad picture, but it is the condition of thousands of women between the ages of fifteen and forty-five, who are brought to the grave by ignorance, or neglect to take the proper remedy.

To all who are afflict

grave by ignorance, or neglect to take the proper remedy.

To all who are afflicted with any of the symptoms above-mentioned, in connection with an irregularity of the "monthly sickness," we earnestly say Take Dr. J. Bradfirsl.b's Female Regulator. A few onness taken, you will at once experience its benefit, and with a little patience, you will be fully restored to health. This remedy has been extensively used for upward of twenty years by many of the most experienced and successful physicians in Georgia. No family should be without two or three bottles.

This will certify that two members of my immediate family, after having suffered for many years from menstrual irregularity, and having been treated without benefit by various medical doctors, were at length completely cured by one bottle of Dr. J. Bradfield's Female Regulator. I therefore deem it my duty to furnish this certificate, with the hope of drawing the attention of suffering womankind to the merits of a medicine whose power in curing irregular and suppressed menstruation has been proven under my own personal observation. Its effect on such cases is truly wonderful, and well may the remedy be called "Woman's Best Friend." Yours, respectfully, James W. Stranse.
